Guitar World Holiday Gift Guide

First Act DK1000 HI-Fi iPod Docking Station & Amp

Just in time for the Holidays, First Act announces the release of their DK1000 high performance iPod docking station that doubles as a guitar amplifier. Music lovers can not only amplify their iPods with this unique docking station, but plug in their acoustic or electric guitars and play along with their MP3 playlists as well.

The DK1000 boasts a two-way speaker system with four-inch woofers and 3/4 inch tweeters and an auxiliary stereo input for gaming devices, microphones, other portable MP3 players or musical instruments. Just like First

Act's guitar amps, the DK1000 includes variable tone and switchable gain channels for different guitar tones – bringing the player closer to the sounds of their favorite guitarists.

Price: \$99.99
